## A space shuttle touched down in Bonn – with an extraterrestrial glass facade design ...

Granted, the NASA also constructs space shuttles. But none of them provides such a stunningly beautiful view of the world as the Hotel Kameha Grand Bonn does. Using the noble SOLARWER® solar control insulation glass from FLACHGLAS Wernberg, the architect Karl-Heinz Schommer added a remarkable aesthetic to the building.

## The first public order office where a long wait is enjoyable.

Nobody is really keen on visiting a public order office. Usually. But the new six-floor public order office in Frankfurt conveys friendly openness and transparency. Shifted window levels give the facade a high recognition factor. Our WTC solar control insulation glass ensures a perfect climate in the public order office, at any time. Even if it really heats up.

## Our mission: permanently accident free.

Occupational safety and environmental protection are two of the most important priorities at FLACHGLAS Wernberg GmbH. We are currently involved in increasing our employees' awareness of safety issues with the ultimate target of complete and sustainable accident prevention in the future.

## We have supplied to Japan the glass for 29 trains. And have not given a sole reason for complaints.

"Kurêmu" is Japanese and means complaint. Although we had to deliver more than 3000 side-panel windows, 900 door glass units and 1200 partition panels for 29 trains, on schedule to the Japanese city of Kasado, we did not come up with a sole "Kurêmu". "Domo arigato" for the confidence placed in us, dear Japanese!
