## Extremely thin, extremely valuable - extremely FLACHGLAS Wernberg.

Achieving maximum efficiency using a minimum of means is a very mega-trend. Also in glass. The topic "weight reduction" plays an increasingly important role both in the automotive and construction sector. FLACHGLAS Wernberg has turned this trend into concrete technology with the new LiSEC high convection furnace.

## Wernberg safety boarding the Cologne Diesel network.

There's a lot at stake. To be precise, around 7.2 million train kilometres per year. At the latitude of Cologne this is equivalent to more than 280 circumnavigations of the earth. 56 new LINT 54 and LINT 81 trains will face this respectable challenge within the so called Cologne Diesel network. Windows produced by FLACHGLAS Wernberg ensure once again optimal comfort and highest safety standards.
