

Newsletter 3.10

INFRASTOP® protects from the sun. Not from admiring glances.

When looking at the new EuroCityCenterWest in Mannheim, the sun is proven to be absolutely right. Needless to say that such a fascinating architecture catches the attention, also from a celestial body! Our INFRASTOP® solar control insulating glass lets the sun in. Keeping the heat out. That's cool, isn't it?

SAUDI BUILD 2010

The 22nd International
Construction Technology and
Building Materials Exhibition

We could not come up with water for BRITA either. But with the best glass and the best service.

BRITA refines water. FLACHGLAS Wernberg refines glass. However, the new headquarters required not only a high-quality precious glass facade but also our expertise, our personal advice and the intensive technical support by the planner.

After all, our glass is magnetic. A large number of visitors at the FLACHGLAS Wernberg stand.

Anyhow, visitors at InnoTrans 2010 in Berlin were magically attracted by our latest developments for the design of rolling stock interiors. At our stand we showed our regular customers and potential clients, from Australia to Zimbabwe, the future destination of glass for interior spaces.

A warm welcome to our newcomers!

20 new "Wernbergers" started their apprenticeship with us on September 1, 2010. We wish them the best of luck.
